

Paper Sack Leveler

Paper Sack Leveler is specially designed to give proper shape of the tea filled paper sacks.

Paper Sack Leveler is specially designed to give proper shape of the tea filled paper sacks. The manually filled tea sack will move through two conveyors in top and bottom. The pressure conveyor on top, operated by pneumatically controlled cylinders. This will give pressure gently and gradually on sack to get the shape while forward and backward movement of sack without spoiling the tea inside.

The Paper Sack Leveler is connected with a feed conveyor and a discharge collecting table and all can be operating by single operator.

Technical Details:

1. One Carry and One Pressure conveyor with 600 mm width belt.
2. Feed Conveyor with 600mm width belt,
3. One Stainless Steel made inclined discharge table,
4. All belt support rollers are fitted with heavy duty bearing,
5. System operated with powerful pneumatic cylinder along with air compressor,
6. Power 415 V AC, 3 Ph., 50 Hz.

Note: Due to a continuous process of improvement of product, the designs and specifications are to change without prior notice.
