

Trinick Sorter

The Trinick Sorter is very simple single deck Sorter as against other multi deck machines. The sorter can be used with or without fibre extracting attachment.

Features

- Single deck consisting 5 or 6 S.S. Mesh with different size, to sort the Tea. The Tea fed through hopper travels over the mesh to be sorted in different grades.
- The P.V.C. Rollers fitted over the tray take care of fibre extraction.
- The motion to tray comes through a single connecting rod to deck frame which is supported by spring leg. The eccentric and drive shaft are provided with heavy duty bearings.
- This machine is designed with light but sturdy and well aligned frame work with a strong chassis made of channel iron for very smooth and noiseless operation.

Technical Data:

- Machine Length - 3670 mm.
- Machine Width - 1200 mm
- Machine Height -
 - Feed End- 1415 mm.
 - Discharge End- 580 mm.
- Power- 1hp, 1000 rpm.

(Due to continuous process of product development, the design is subject to change without prior notice.)
