

# Fibre Extractor

## Salient Features:

- The Machine is fitted with number of glossy P.V.C. Roller of 315mm dia.
- A pressure bar of woollen felt is attached with the entire length of the Roller to create even magnetic charge to catch loose fibre easily.
- A simple and efficient drive arrangement for motion to the tray.
- The robust machine structure and efficient using of heavy duty bearing and bushes gives noiseless, vibration free smooth operation.
- The height between the tray and roller can be adjusted according to requirement.
- The Machine can also be used as bulk separator of Dust, Fanning and broken grade by using one or multiple S.S. mesh tray with the dimpled tray.

## Technical Data:

- Overall Machine Length- 3000/4200 mm.
- Machine Width- 1350 / 1630 / 1985.
- Height- 1475 /1600.
- No of Roller- 4/5/6.
- Motor- 1 / 2 hp, 1000 rpm.
- Crank Shaft RPM- 450-500 rpm.
